Obituary

Professor John J. Roberts 1926–1990
P. Brookes and S. Venitt (Great Britain) 1

Research Papers

In vitro mutagenesis in the *lacI* gene of *Escherichia coli*: Fate of 3′-terminal mispairs versus internal base mispairs in a transfection assay
R. Maldonado-Rodriguez and K.L. Beattie (U.S.A.) 5

A comparison of induced mutation at homologous alleles of the tk locus in human cells
S.A. Amundson and H.L. Liber (U.S.A.) 19

Micronuclei and chromosome aberrations in *Xenopus laevis* spermatocytes and spermatids exposed to adriamycin and colcemid
M.S. Risley and G.M. Pohorenec (U.S.A.) 29

Pro-oxidative interactions of dithranol with human phagocytes promote oxidative damage to DNA of bystander leucocytes
D.M.T. Forrester, C.E.J. Van Rensburg and R. Anderson (Republic of South Africa) 39

DNA sequence analysis of spontaneous and β-methoxy-acrolein-induced mutations in *Salmonella typhimurium hisD3052*
S.M. O'Hara and L.J. Marnett (U.S.A.) 45

Diethyldithiocarbamate suppresses the plant activation of aromatic amines into mutagens by inhibiting tobacco cell peroxidase
M.J. Plewa, S.R. Smith and E.D. Wagner (U.S.A.) 57

Induction of rat liver DNA alterations by chronic administration of peroxisome proliferators as detected by ^{32}P-postlabeling
E. Randerath, K. Randerath, R. Reddy, T.F. Danna, M.S. Rao and J.K. Reddy (U.S.A.) 65

Synergism between aflatoxins in covalent binding to DNA and in mutagenesis in the photoactivation system
A.-A. Stark and D.F. Liberman (Israel, U.S.A.) 77

Evaluation of the DNA-repair host-mediated assay. III. Relationship between metabolic activation of dimethylnitrosamine and organ-specific differential lethality induced in *E. coli* indicator strains
M.J. Zeilmaker, C.M.M. Van Teylingen and G.R. Mohn (The Netherlands) 87

About the mutagenicity of chlorine-substituted furanones and halopropenals. A QSAR study using molecular orbital indices
K. Tuppurainen, S. Lötjönen, R. Laatikainen, T. Vartiainen, U. Maran, M. Strandberg and T. Tamm (Finland, U.S.S.R.) 97

A cytogenetic follow-up study of the victims of a radiation accident in Goiania (Brazil)
A.T. Natarajan, R.C. Vyas, J. Wiegant and M.P. Curado (The Netherlands, Brazil) 103

cDNA-expressed human cytochrome P450s: a new age of molecular toxicology and human risk assessment
F.J. Gonzalez, C.L. Crespi and H.V. Gelboin (U.S.A.) 113

The nature of X-ray-induced mutations after recovery in excision repair-deficient (*mus-201*) Drosophila females
J.C.J. Eeken, C. Vreeken, A.W.M. De Jong and A. Pastink (The Netherlands) 129

Cytogenetic effects of pulsing electromagnetic field on human lymphocytes in vitro: chromosome aberrations, sister-chromatid exchanges and cell kinetics
A.M. Khalil and W. Qassem (Jordan) 141

Premature onset of mitosis and potentiation of chromosome damage induced by poly-D-lysine in plant cells: evidence for G_2 repair
F. Cortés and S. Mateos (Spain) 147

Arylamine activation following chronic ethanol ingestion by rats: studies on the liver S9, microsomal and cytosolic fractions and comparison with Aroclor 1254 pretreatment
C.A. Traynor, B.S. Shane, A.K.D. Hajos and G.W. Winston (U.S.A.) 153

Effect of thiols on micronucleus frequency in γ-irradiated mammalian cells
D. Murray, A. Prager, E.M. Altschuler and W.A. Brock (U.S.A.) 167

Sister-chromatid exchange in human B- and T-lymphocytes exposed to bleomycin, cyclophosphamide, and ethyl methanesulfonate
K. Miller (F.R.G.) 175

Special Issue

Genetic Susceptibility to Cancer

edited by Arthur D. Bloom *assisted by* Debra A. Deres

Preface
A.D. Bloom (U.S.A.) 183
Overview: Genes that predispose to cancer
A.G. Knudson Jr. (U.S.A.) 185
The segregation of cancer-causing genes in human populations
W.J. Schull (U.S.A.) 191
Molecular genetics of human cancer predisposition and progression
W.K. Cavenee, H.J. Scrable and C.D. James (Canada) 199
Heterogeneity of DNA repair at the gene level
P.C. Hanawalt (U.S.A.) 203
Properties and applications of human DNA repair genes
L.H. Thompson (U.S.A.) 213
Implications for genetic toxicology of the chromosomal breakage syndromes
J.A. Heddle (Canada) 221
Chromosome abnormalities in human cancer and leukemia
A.A. Sandberg (U.S.A.) 231
Genetic and environmental factors causing variation in drug response
E.S. Vesell (U.S.A.) 241
Is environmental carcinogenesis modulated by host polymorphism?
J.R. Idle (Great Britain) 259
Role of genetics and drug metabolism in human cancer risk
D.W. Nebert (U.S.A.) 267
Future research directions in cancer ecogenetics
G.S. Omenn (U.S.A.) 283
